The accompanying Notes to Condensed Consolidated Financial Statements are an integral part of these statements.

STEPAN COMPANY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2001 and December 31, 2000
Unaudited

1. CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The condensed consolidated financial statements included herein have been prepared by the company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations, although management believes that the disclosures are adequate and make the information presented not misleading. It is suggested that these condensed consolidated financial statements be read in conjunction with the financial statements and the notes thereto included in the company's latest Annual Report to Stockholders and the Annual Report to the Securities and Exchange Commission on Form 10-K for the year ended December 31, 2000. In the opinion of management all adjustments, consisting only of normal recurring adjustments, necessary to present fairly the consolidated financial position of Stepan Company as of June 30, 2001, and the consolidated results of operations for the three and six months then ended and cash flows for the six months then ended, have been included.

2. INVENTORIES

Inventories include the following amounts:

(Dollars in thousands)	6/30/01	12/31/00
	-----	-----
Inventories valued primarily on LIFO basis -		
Finished products	\$ 36,349	\$ 40,515
Raw materials	20,413	19,617
	-----	-----
Total inventories	\$ 56,762	\$ 60,132
	=====	=====

If the first-in, first-out (FIFO) inventory valuation method had been used for all inventories, inventory balances would have been approximately \$9,100,000 and \$8,900,000 higher than reported at June 30, 2001, and December 31, 2000, respectively.

3. CONTINGENCIES

There are a variety of legal proceedings pending or threatened against the company. Some of these proceedings may result in fines, penalties, judgments or costs being assessed against the company at some future time. The company's operations are subject to extensive local, state and federal regulations, including the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 ("Superfund") and the

Superfund amendments of 1986. The company, and others, have been named as potentially responsible parties at affected geographic sites. As discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in this filing, the company believes that it has made adequate provisions for the costs it may incur with respect to these sites. The company has estimated a range of possible environmental and legal losses from \$7.4 million to \$35.0 million at June 30, 2001. At June 30, 2001, the company's reserve was \$17.6 million for legal and environmental matters compared to \$16.6 million at December 31, 2000.

For certain sites, estimates cannot be made of the total costs of compliance, or the company's share of such costs; accordingly, the company is unable to predict the effect thereof on future results of operations. In the event of one or more adverse determinations in any annual or interim period, the impact on results of operations for those periods could be material. However, based upon the company's present belief as to its relative involvement at these sites, other viable entities' responsibilities for cleanup and the extended period over which any costs would be incurred, the company believes that these matters will not have a material effect on the company's financial position. Certain of these matters are discussed in Item 3, Legal Proceedings, in the 2000 Form 10-K Annual Report, Item 1, Legal Proceedings, in this Form 10-Q, and in other filings of the company with the Securities and Exchange Commission, which are available upon request from the company.

Following are summaries of the environmental proceedings related to the company's Maywood, New Jersey, and Ewan and D'Imperio environmental sites:

Maywood, New Jersey, Site:

As reported previously, the company's site in Maywood, New Jersey and property formerly owned by the company adjacent to its current site, were listed on the National Priorities List in September 1993 pursuant to the provisions of the Comprehensive Environmental Response Compensation and Liabilities Act (CERCLA) because of certain alleged chemical contamination. Pursuant to an Administrative Order on Consent entered into between the United States Environmental Protection Agency (USEPA) and the company for property formerly owned by the company, and the issuance of an order by USEPA to the company for property currently owned by the company, the company completed a Remedial Investigation Feasibility Study (RI/FS) in 1994. In addition, the company submitted an FS Addendum to USEPA in October 2000. The company received comments from USEPA on the FS Addendum in June 2001, and anticipates that it will be submitting a response to these comments in August 2001. The company has been awaiting the issuance of a Record of Decision (ROD) from USEPA which would relate to both the currently owned and formerly owned company property and would recommend the type of remediation required on each property. It is the company's understanding the USEPA anticipates that it will issue a proposed ROD for the soil response in December 2001 and a separate proposed ROD for the groundwater response

sometime during 2002. The final RODs will be issued sometime after the public comment periods.

In 1985, the company entered into a Cooperative Agreement with the United States of America represented by the Department of Energy (Agreement). Pursuant to this Agreement, the Department of Energy (DOE) took title to radiological contaminated materials and was to remediate, at its expense, all radiological waste on the company's property in Maywood, New Jersey. The Maywood property (and portions of the surrounding area) were remediated by the DOE under the Formerly Utilized Sites Remedial Action Program, a federal program under which the U.S. Government undertook to remediate properties which were used to process radiological material for the U.S. Government. In 1997, responsibility for this clean-up was transferred to the United States Army Corps of Engineers (USACE). On January 29, 1999, the company received a copy of a USACE Report to Congress dated January 1998 in which the USACE expressed their intention to evaluate, with the USEPA, whether the company and/or other parties might be responsible for cost recovery or contribution claims related to the Maywood site. Subsequent to the issuance of that report, the USACE advised the company that it had requested legal advice from the Department of Justice as to the impact of the Agreement.

By letter dated July 28, 2000, the Department of Justice advised the company that the USACE and USEPA had referred to the Justice Department claims against the company for response costs incurred or to be incurred by the USACE, USEPA and the DOE in connection with the Maywood site and the Justice Department stated that the United States is entitled to recovery of its response costs from the company under CERCLA. The letter referred to both radiological and non-radiological hazardous waste at the Maywood site and stated that the United States has incurred unreimbursed response costs to date of \$138 million. Costs associated with radiological waste at the Maywood site, which the company believes represent all but a small portion of the amount referred to in the Justice Department letter, could be expected to aggregate substantially in excess of that amount. In the letter, the Justice Department invited the company to discuss settlement of the matter in order to avoid the need for litigation. The company believes that its liability, if any, for such costs has been resolved by the aforesaid Agreement. Despite the fact that the company continues to believe that it has no liability to the United States for such costs, discussions with the Justice Department are currently ongoing to attempt to resolve this matter.

The company believes it has adequate reserves for claims associated with the Maywood site. However, depending on the results of the ongoing discussions regarding the Maywood site, the final cost of the remediation could differ from the current estimates.

Ewan and D'Imperio Site:

As reported previously, the company has been named as a potentially responsible party (PRP) in the case USEPA v. Jerome Lightman (92 CV 4710 D. N. J.) which involves the Ewan and D'Imperio Superfund Sites located in New Jersey. Trial on the issue of the company's liability at these sites was completed in March 2000. The company is awaiting a decision from the court. If the company is found liable at either site, a second trial as to the company's allocated share of clean-up costs at these sites will likely be held in 2002. The company believes it has adequate defenses to the issue of liability. In the event of an unfavorable outcome related to the issue of liability, the company believes it has adequate reserves.

4. EARNINGS PER SHARE

Below is the computation of basic and diluted earnings per share for the three and six months ended June 30, 2001 and 2000.

(In thousands, except per share amounts)

	Three Months Ended June 30		Six Months Ended June 30

	=====	=====	=====	=====

5. COMPREHENSIVE INCOME

Below is the company's comprehensive income for the three and six months ended June 30, 2001 and 2000:

(Dollars in thousands)	Three Months Ended June 30		Six Months Ended June 30	
	2001	2000	2001	2000
Net income	\$6,173	\$6,625	\$ 9,801	\$10,896
Other comprehensive income/(loss):				
Foreign currency translation adjustments	505	(824)	(1,006)	(1,470)
Comprehensive income	<u>\$6,678</u>	<u>\$5,801</u>	<u>\$ 8,795</u>	<u>\$ 9,426</u>

6. SEGMENT REPORTING

Stepan Company has three reportable segments: surfactants, polymers and specialty products. Financial results of Stepan Company's operating segments for the three and six months ended June 30, 2001 and 2000, are summarized below:

(Dollars in thousands)	Surfactants	Polymers	Specialty Products	Segment Totals
For the quarter ended June 30, 2001				
Net sales	\$140,408	\$35,904	\$ 6,455	\$182,767
Operating income	10,435	5,770	2,203	18,408
For the quarter ended June 30, 2000				
Net sales	\$135,079	\$37,685	\$ 5,133	\$177,897
Operating income	12,394	5,863	888	19,145
For six months ended June 30, 2001				
Net sales	\$280,786	\$66,737	\$12,101	\$359,624
Operating income	20,351	9,692	3,183	33,226
For six months ended June 30, 2000				
Net sales	\$274,247	\$69,271	\$ 9,367	\$352,885
Operating income	24,180	10,278	690	35,148

Below are reconciliations of segment operating income to consolidated income before income taxes:

	Three Months Ended June 30		Six Months Ended June 30	
	2001	2000	2001	2000
Operating income segment totals	\$18,408	\$19,145	\$ 33,226	\$ 35,148
Unallocated corporate expenses/(a)/	(7,056)	(6,314)	(14,045)	(13,317)
Interest expense	(1,805)	(2,186)	(3,761)	(4,237)
Income from equity joint venture	493	214	620	268
Consolidated income before income taxes	\$10,040	\$10,859	\$ 16,040	\$ 17,862

(a) Includes corporate administrative and corporate manufacturing expenses, which are not included in segment operating income and not used to evaluate segment performance.

7. NEW ACCOUNTING STANDARDS

In June 1998, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities", effective for fiscal years beginning after June 15, 1999. In June 1999, the FASB issued SFAS No. 137, which deferred the effective date to fiscal years beginning after June 15, 2000. The new standard establishes accounting and reporting requirements for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. Such instruments are to be recognized on the balance sheet as either an asset or a liability measured at fair value. Changes in fair value must be recognized currently in earnings or in other comprehensive income if specific hedge criteria are met. Special accounting for qualifying hedges allows a derivative instrument's gains and losses to offset related results on the hedged item in the statement of income, to the extent effective. If a transaction is designated to receive hedge accounting, the company must establish at the inception of the hedge the method it will use for assessing the effectiveness of the hedge and the measurement approach for determining the ineffective aspect of the hedge. At December 31, 2000, and June 30, 2001, the company held no derivative instruments that fell under the accounting rules of SFAS No. 133. Therefore, the adoption of SFAS No. 133 on January 1, 2001, had no effect on the company's consolidated results of operations or financial position.

In January 2001, the Emerging Issues Task Force (EITF), issued EITF Issue No. 00-22 "Accounting for 'Points' and Certain Other Time-Based or Volume-Based Sales Incentive Offers, and Offers for Free Products or Services to Be Delivered in the Future." EITF Issue No. 00-22 provides guidance regarding timing of recognition and income statement classification of costs incurred in connection with offers of volume-based sales incentives that are provided to customers at a future date upon reaching certain volume purchase levels. This guidance requires certain volume rebate offers delivered subsequent to the related transactions in which they are earned, be recognized when incurred and reported as a reduction of revenue in the statement of operations. The effective date of EITF Issue No. 00-22 was the first quarter ending after February 15,

2001. The adoption of the issue had no impact on the company's statements of income or financial position.

8. RECLASSIFICATIONS

Certain amounts in the 2000 financial statements have been reclassified to conform to the 2001 presentation.

STEPAN COMPANY
Management's Discussion and Analysis of
Financial Condition and Results of Operations

The following is management's discussion and analysis of certain significant factors which have affected the company's financial condition and results of operations during the interim period included in the accompanying condensed consolidated financial statements.

LIQUIDITY AND CAPITAL RESOURCES

For the first six months of 2001, net cash from operations totaled \$12.3 million compared to \$14.7 million for the same period in 2000. Working capital totaled to a use of \$19.8 million compared to a use of \$15.2 million for the same period last year. Accounts receivable increased by \$11.4 million for the current year period compared to \$7.1 million in 2000 primarily as a result of higher seasonal sales increases this year. Inventories decreased by \$3.4 million for the current year period compared to an increase of \$3.6 million last year. Accounts payable and accrued liabilities decreased by \$11.0 million for the year to date, compared to last year's decrease of \$4.2 million.

Capital expenditures totaled \$17.2 million for the six months ended June 30, 2001, compared to \$12.0 million for the same period in 2000. Total year capital spending for 2001 is projected to be higher than the \$28.4 million recorded during 2000.

Consolidated debt has increased by \$9.6 million, to \$115.7 million, since December 31, 2000. As of June 30, 2001, the ratio of long-term debt to long-term debt plus shareholders' equity was 39.8 percent compared to 38.5 percent last year-end.

The company maintains contractual relationships with its domestic banks that provide for revolving credit of up to \$60 million, which may be drawn upon as needed for general corporate purposes. The company also meets short-term liquidity requirements through uncommitted domestic bank lines of credit. The company's foreign subsidiaries maintain committed and uncommitted bank lines of credit in their respective countries to meet working capital requirements as well as to fund capital expenditure programs and acquisitions.

The company anticipates that cash from operations and from committed credit facilities will be sufficient to fund anticipated capital expenditures, dividends and other planned financial commitments for the foreseeable future. Any substantial acquisitions would require additional funding.

There have been no material changes in the company's market risks since December 31, 2000.

RESULTS OF OPERATIONS

 Three Months Ended June 30, 2001 and 2000

Net income for the second quarter ended June 30, 2001, decreased seven percent from \$6.6 million in 2000, or \$0.64 per share diluted, to \$6.2 million, or \$0.61 per share diluted. Net sales rose three percent to \$182.8 million in the second quarter of 2001 from \$177.9 million a year ago. Net sales by segment were:

(Dollars in thousands)	Three Months Ended June 30		
	2001	2000	% Change
Net Sales:			
Surfactants	\$140,408	\$135,079	+ 4%
Polymers	35,904	37,685	- 5%
Specialty Products	6,455	5,133	+26%
Total	\$182,767	\$177,897	+ 3%

Surfactants net sales increased four percent from \$135.1 million in the second quarter of 2000 to \$140.4 million in the second quarter of 2001. The rise was due to a six percent increase in sales volume which more than offset a two percent decline in average selling prices. Foreign operations led to the improvement reporting a 25 percent increase in net sales due to a 28 percent rise in sales volume. European and Colombian operations contributed most to the increase reporting sales volume gains of 36 percent and 69 percent, respectively. Domestic operations which accounted for 74 percent of total surfactant revenues reported a two percent decline in net sales, dropping from \$106.3 million in the second quarter of 2000 to \$104.4 million in the same period of 2001. A three percent decline in average selling prices more than offset a one percent rise in sales volume. Average selling prices fell due to product mix.

Surfactants gross profit declined \$2.0 million, or nine percent, to \$19.9 million in the second quarter of 2001 from \$21.9 million in the second quarter of 2000. Domestic operations reported a \$2.4 million, or 13 percent, decrease in gross profit due to a decline in average margins. The decline in average margins was mainly due to weaker sales mix and higher energy costs. Foreign operations' gross profit increased \$0.4 million, or 10 percent. Higher sales volume, partially offset by a drop in average margins, accounted for the improvement. South American operations contributed most to the rise in profit due to higher sales volume and improved average margins.

Polymers net sales decreased \$1.8 million, or five percent, to \$35.9 million in the second quarter of 2001 from \$37.7 million a year ago. The decline was due to a 12 percent decrease in sales volume, which more than offset a nine percent rise in average selling prices. Net sales for Phthalic Anhydride (PA) declined \$3.1 million, or 27 percent, and accounted for most of the decrease. The decline was due to a 35 percent drop in sales volume, which offset a 12 percent rise in average selling price. Higher raw material costs, which were passed on to customers, led to the increase in average prices. Net sales for global polyurethane polyols rose 14 percent to \$22.0 million in the second quarter of 2001 from \$19.3 million in the same period of 2000.

Domestic operations accounted for the improvement in revenue based on increased sales volume and a rise in average selling prices. European net sales decreased due to a decline in sales volume and lower average selling prices. Polyurethane systems reported a \$1.4 million, or 21 percent, decline in net sales between quarters. A 27 percent drop in sales volume accounted for the decrease. A nine percent rise in average selling prices somewhat offset the effect of the lower sales volume.

Polymers gross profit fell \$0.2 million, or three percent, from \$7.6 million in the second quarter of 2000 to \$7.4 million in the same period of 2001. PA's gross profit dropped \$0.9 million, or 36 percent, between quarters. Lower sales volume coupled with a decline in average margins accounted for the decrease in earnings. Global polyurethane polyols' gross profit rose \$0.9 million, or 20 percent, to \$5.2 million for the second quarter of 2001 from \$4.3 million for the same period of 2000. Domestic operations contributed \$1.1 million in gross profit improvement due to improved average margins and sales volume. The overall improvement in polyurethane polyols was somewhat tempered by European operations' drop in earnings resulting from reduced margins and decreased sales volume. Market pressure and high costs led to the lower results. Polyurethane systems gross profit decreased 12 percent between quarters from \$1.4 million in the second quarter of 2000 to \$1.2 million in the same quarter of 2001. A 27 percent decrease in sales volume, partially offset by a rise in average margins, accounted for the drop. Higher average selling prices and favorable sales mix led to the improved average margins.

Specialty products reported \$6.5 million in net sales in the second quarter of 2001 compared to \$5.1 million in the second quarter of 2000. The improvement was primarily due to increased sales volume. Gross profit was \$2.5 million in the second quarter of 2001 compared to \$1.2 million reported a year ago. A rise in sales volume of higher margin products led to the overall improvement.

Operating expenses for the second quarter 2001 increased three percent from \$17.8 million in 2000 to \$ 18.3 million in 2001. Administrative expenses increased 10 percent between quarters. Higher legal and payroll expenses, partially offset by a \$0.6 million insurance recovery, led to the increased administrative expenses. Marketing expenses declined three percent and research and development expenses increased two percent between quarters.

Interest expense declined 17 percent from quarter to quarter due to lower debt levels and lower interest rates.

Income from the Philippines equity joint venture increased from \$0.2 million in the second quarter of 2000 to \$0.5 million in the second quarter of 2001. The rise was due to favorable sales mix.

Six Months Ended June 30, 2001 and 2000

Net income for the first six months ended June 30, 2001, was \$9.8 million, or \$0.97 per share diluted, down \$1.1 million, or 10 percent, from \$10.9 million, or \$1.05 per share diluted, for the same period in 2000. Net sales increased two percent to \$359.6 million from \$352.9 million reported last year. Net sales by segment were:

(Dollars in thousands)	Six Months Ended June 30		
	2001	2000	% Change
Net Sales:			
Surfactants	\$280,786	\$274,247	+ 2%
Polymers	66,737	69,271	- 4%
Specialty Products	12,101	9,367	+29%
Total	\$359,624	\$352,885	+ 2%

Surfactants net sales increased two percent from \$274.2 million in 2000 to \$280.8 million in 2001. Improvement in foreign operations led to the overall increase. Net sales for foreign surfactants operations rose 12 percent from \$61.1 million in the first half of 2000 to \$68.8 million in 2001, due to higher sales volume. European and Colombian operations led to the foreign operations' rise in revenue due to improved sales volume. Mexican operations reported a 13 percent drop in net sales due primarily to an 11 percent decline in sales volume. Domestic surfactants, which accounted for 76 percent of total surfactant revenues, reported a \$1.1 million, or one percent, decrease in revenue. A three percent decline in average selling prices more than offset a three percent rise in sales volume. Sales volume increased due to the improvement in the company's personal care business. Average selling prices declined due to product mix.

Surfactants gross profit decreased nine percent between years from \$43.0 million in 2000 to \$39.0 million in 2001. Domestic operations reported a \$3.9 million, or 11 percent, decline in earnings, due to a drop in average margins. The decrease in average margins was mainly due to weaker sales mix and higher energy costs. Gross profit for foreign surfactants stayed unchanged between years. A 13 percent improvement in sales volume was offset by a decline in average margins.

Polymers net sales decreased four percent from \$69.3 million in 2000 to \$66.7 million in 2001. Sales volume decreased 12 percent and more than offset a 10 percent rise in average selling prices. PA's net sales fell 24 percent to \$17.0 million for the first half of 2001 from \$22.3 million for the first half of 2000. Lower sales volume led to the decrease and more than offset an 11 percent rise in average selling prices. Higher raw material costs, which were passed on to customers, led to the average selling prices increase. Global polyurethane polyols net sales rose 10 percent to 39.2 million for the first six months in 2001 from \$35.8 million for the same period of 2000. Domestic polyols accounted for most of the improvement due to higher sales volume and increased average selling prices. Polyurethane systems net sales fell six percent to \$10.6 million for the current year from \$11.2 million for the prior year. A 13 percent decline in sales

volume led to the decrease in revenue. Higher average selling prices somewhat offset the effect of the decline in sales volume.

Polymers gross profit decreased \$0.6 million, or five percent, from \$13.5 million in 2000 to \$12.9 million in 2001. Gross profit for PA declined 48 percent to \$2.0 million in the first six months of 2001 from \$3.8 million a year ago. Lower sales volume and average margins accounted for the lower results. Higher unit overhead costs resulting from decreased production volume led to the lower margins. Global polyurethane polyols gross profit rose \$1.1 million, or 14 percent between years. Domestic operations reported an increase in profit of \$1.5 million, or 18 percent, due to higher sales volume and improved average margins. European gross profit fell \$0.5 million on reduced average margins. Market pressure and higher costs led to the decrease in margins. Polyurethane systems gross profit remained almost unchanged at \$2.5 million from year to year. Improved margins were offset by a 13 percent drop in sales volume. Average margins improved due to a favorable sales mix and average selling price increase.

Specialty products reported \$12.1 million in net sales for the first six months of 2001, an increase of \$2.7 million from \$9.4 million revenue a year ago. The increase was due to improved sales volume and higher average selling prices. Gross profit rose \$2.4 million from year to year. The increase was due to higher sales volume and favorable sales mix.

Operating expenses for the first half of 2001 increased one percent from \$35.9 million in 2000 to \$36.4 million in the current year. Administrative expenses rose six percent between years. Higher legal and payroll expenses, partially offset by a \$0.6 million insurance recovery, led to the increased administrative expenses. Marketing expenses decreased one percent and research and development expenses stayed unchanged.

Interest expenses declined 11 percent from year to year due to lower average debt levels coupled with slightly lower overall borrowing rates.

Income from the Philippines equity joint venture increased to \$0.6 million in 2001 from \$0.3 million a year ago. Higher sales volume, a more favorable sales mix and a smaller peso devaluation loss led to the improvement.

OUTLOOK

- - - - -

The company does not expect to see significant improvement in the second half of the year due to the uncertainty surrounding the economy. In addition, the company just started the implementation of an enterprise resource planning system that will result in additional expenses to be recognized over the next 15 months.

ENVIRONMENTAL AND LEGAL MATTERS

- - - - -

The company is subject to extensive federal, state and local environmental laws and regulations. Although the company's environmental policies and practices are designed to ensure compliance with these laws and regulations, future developments and increasingly stringent environmental

regulation could require the company to make additional unforeseen environmental expenditures. The company will continue to invest in the equipment and facilities necessary to comply with existing and future regulations. During the first six months of 2001, company expenditures for capital projects related to the environment were \$0.7 million and should approximate \$1.0 million to \$1.6 million for the full year 2001. These projects are capitalized and typically depreciated over 10 years. Recurring costs associated with the operation and maintenance of facilities for waste treatment and disposal and managing environmental compliance in ongoing operations at our manufacturing locations were \$3.8 million for the first six months of 2001.

The company has been named by the government as a potentially responsible party at 17 waste disposal sites where cleanup costs have been or may be incurred under the federal Comprehensive Environmental Response, Compensation and Liability Act and similar state statutes. In addition, damages are being claimed against the company in general liability actions for alleged personal injury or property damage in the case of some disposal and plant sites. The company believes that it has made adequate provisions for the costs it may incur with respect to these sites. The company has estimated a range of possible environmental and legal losses from \$7.4 million to \$35.0 million at June 30, 2001. At June 30, 2001, the company's reserve was \$17.6 million for legal and environmental matters compared to \$16.6 million at December 31, 2000. During the first six months of 2001, expenditures related to legal and environmental matters approximated \$0.8 million. For certain sites, estimates cannot be made of the total costs of compliance or the company's share of such costs; accordingly, the company is unable to predict the effect thereof on future results of operations. In the event of one or more adverse determinations in any annual or interim period, the impact on results of operations for those periods could be material. However, based upon the company's present belief as to its relative involvement at these sites, other viable entities' responsibilities for cleanup and the extended period over which any costs would be incurred, the company believes that these matters will not have a material effect on the company's financial position. Certain of these matters are discussed in Item 3, Legal Proceedings, in the 2000 Form 10-K Annual Report and in other filings of the company with the Securities and Exchange Commission, which are available upon request from the company. See Footnote 3, Contingencies, in Notes to Condensed Consolidated Financial Statements, and Item 1, Legal Proceedings, in this Form 10-Q for a summary of the environmental proceedings related to the company's Maywood, New Jersey, and Ewan and D'Imperio environmental sites.

NEW ACCOUNTING STANDARDS

- - - - -

In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (SFAS) No. 141, "Business Combinations" and SFAS No. 142, "Goodwill and Other Intangible Assets," effective for fiscal years beginning after December 15, 2001 for acquisitions entered into prior to June 30, 2001 and effective immediately for acquisitions entered into after June 30, 2001. The SFAS No. 142 addresses financial accounting and reporting for goodwill and other intangible assets subsequent to their acquisition. The new standard establishes that goodwill is no longer to be amortized. Instead, goodwill will be tested for impairment by applying a fair-value-based test each year, and more frequently, if circumstances indicate a possible impairment. If the carrying amount exceeds the implied fair

value of that goodwill, an impairment loss shall be recognized. Equity-method goodwill is not, however, subject to the new impairment rules; the impairment guidance in existing rules for equity-method investments continues to apply. The standard also establishes new accounting guidelines for intangible assets that are determined to have an indefinite useful life. These assets are no longer subject to amortization, but shall be tested for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired. If the carrying amount of an intangible asset exceeds the fair value, an impairment loss shall be recognized in an amount equal to that excess. The company will adopt SFAS No. 141 and SFAS No. 142 on January 1, 2002. Upon adopting SFAS No. 142, the company estimates that approximately \$0.4 million of goodwill amortization will stop being recorded. Presently, it is unknown whether any intangible asset impairments will be recognized or whether the amortization of any identifiable intangible assets will be reduced. The company is currently assessing such matters.

In April 2001, the Emerging Issues Task Force (EITF) issued EITF Issue No. 00-25, "Vendor Income Statement Characterization of Consideration Paid to a Reseller of the Vendor's Products". EITF Issue No. 00-25 provides guidance regarding the reporting of consideration given by a vendor to a reseller of the vendor's products. This Issue requires certain considerations from vendor to a reseller of the vendor's products be considered: (a) as a reduction of the selling prices of the vendor's products and, therefore, be recorded as a reduction of revenue when recognized in the vendor's income statement, or (b) as a cost incurred by the vendor for assets or services received from the reseller and, therefore, be recorded as a cost or an expense when recognized in the vendor's income statement. EITF Issue No. 00-25 is effective for fiscal years beginning after December 15, 2001. The company's accounting policies are currently consistent with the guidance provided in this EITF. Therefore, adoption of this standard is not expected to have an impact on the company's statements of income or financial position.

OTHER

- - - - -

Except for the historical information contained herein, the matters discussed in this document are forward looking statements that involve risks and uncertainties. The results achieved this quarter are not necessarily an indication of future prospects for the company. Actual results in future quarters may differ materially. Potential risks and uncertainties include, among others, fluctuations in the volume and timing of product orders, changes in demand for the company's products, changes in technology, continued competitive pressures in the marketplace, outcome of environmental contingencies, availability of raw materials, foreign currency fluctuations and the general economic conditions.

Item 1 - Legal Proceedings

As reported previously, the company's site in Maywood, New Jersey and property formerly owned by the company adjacent to its current site, were listed on the National Priorities List in September 1993 pursuant to the provisions of the Comprehensive Environmental Response Compensation and Liabilities Act (CERCLA) because of certain alleged chemical contamination. Pursuant to an Administrative Order on Consent entered into between the United States Environmental Protection Agency (USEPA) and the company for property formerly owned by the company, and the issuance of an order by USEPA to the company for property currently owned by the company, the company completed a Remedial Investigation Feasibility Study (RI/FS) in 1994. In addition, the company submitted an FS Addendum to USEPA in October 2000. The company received comments from USEPA on the FS Addendum in June 2001, and anticipates that it will be submitting a response to these comments in August 2001. The company has been awaiting the issuance of a Record of Decision (ROD) from USEPA which would relate to both the currently owned and formerly owned company property and would recommend the type of remediation required on each property. It is the company's understanding the USEPA anticipates that it will issue a proposed ROD for the soil response in December 2001 and a separate proposed ROD for the groundwater response sometime during 2002. The final RODs will be issued sometime after the public comment periods.

In 1985, the company entered into a Cooperative Agreement with the United States of America represented by the Department of Energy (Agreement). Pursuant to this Agreement, the Department of Energy (DOE) took title to radiological contaminated materials and was to remediate, at its expense, all radiological waste on the company's property in Maywood, New Jersey. The Maywood property (and portions of the surrounding area) were remediated by the DOE under the Formerly Utilized Sites Remedial Action Program, a federal program under which the U.S. Government undertook to remediate properties which were used to process radiological material for the U.S. Government. In 1997, responsibility for this clean-up was transferred to the United States Army Corps of Engineers (USACE). On January 29, 1999, the company received a copy of a USACE Report to Congress dated January 1998 in which the USACE expressed their intention to evaluate, with the USEPA, whether the company and/or other parties might be responsible for cost recovery or contribution claims related to the Maywood site. Subsequent to the issuance of that report, the USACE advised the company that it had requested legal advice from the Department of Justice as to the impact of the Agreement.

By letter dated July 28, 2000, the Department of Justice advised the company that the USACE and USEPA had referred to the Justice Department claims against the company for response costs incurred or to be incurred by the USACE, USEPA and the DOE in connection with the Maywood site and the Justice Department stated that the United States is entitled to recovery of its response costs from the company under CERCLA. The letter referred to both radiological and non-radiological hazardous waste at the Maywood site and stated that the United States has incurred unreimbursed response costs to date of \$138 million. Costs associated with radiological waste at the Maywood site, which the company believes represent all but a small portion of the amount referred to in the Justice Department letter, could be expected to aggregate substantially

in excess of that amount. In the letter, the Justice Department invited the company to discuss settlement of the matter in order to avoid the need for litigation. The company believes that its liability, if any, for such costs has been resolved by the aforesaid Agreement. Despite the fact that the company continues to believe that it has no liability to the United States for such costs, discussions with the Justice Department are currently ongoing to attempt to resolve this matter.

The company believes it has adequate reserves for claims associated with the Maywood site. However, depending on the results of the ongoing discussions regarding the Maywood site, the final cost of the remediation could differ from the current estimates.

As reported previously, the company has been named as a potentially responsible party (PRP) in the case USEPA v. Jerome Lightman (92 CV 4710 D. N. J.) which involves the Ewan and D'Imperio Superfund Sites located in New Jersey. Trial on the issue of the company's liability at these sites was completed in March 2000. The company is awaiting a decision from the court. If the company is found liable at either site, a second trial as to the company's allocated share of clean-up costs at these sites will likely be held in 2002. The company believes it has adequate defenses to the issue of liability. In the event of an unfavorable outcome related to the issue of liability, the company believes it has adequate reserves. On a related matter, the company has filed an appeal to the United States Third Circuit Court of Appeals objecting to the lodging of a partial consent decree in favor of the United States Government in this action. Under the partial consent decree, the government recovered past costs at the site from all PRPs including the company. The company paid its assessed share but by objecting to the partial consent decree, the company is seeking to recover back the sums it paid.

Regarding the D'Imperio Superfund Site, USEPA has indicated it will seek penalty claims against the company based on the company's alleged noncompliance with the modified Unilateral Administrative Order. The company is currently negotiating with USEPA to settle its proposed penalty against the company. In addition, the company also received notice from the New Jersey Department of Environmental Protection (NJDEP) dated March 21, 2001, that NJDEP has indicated it will pursue cost recovery against the alleged responsible parties, including the company. The NJDEP's claims include costs related to remediation of the D'Imperio Superfund Site in the amount of \$434,405.53 and alleged natural resource damages in the amount of \$529,584.00 (as of November 3, 2000). The NJDEP has proposed settling such claims, with the company being responsible for a portion of these costs. The company is currently investigating its options with respect to both of these potential actions but does not believe that such settlements, if any, will have a material impact on the financial condition of the company.

As reported previously, the company received a Section 104(e) Request for Information from USEPA dated March 21, 2000, regarding the Lightman Drum Company Site located in Winslow Township, New Jersey. The company responded to this request on May 18, 2000. In addition, the company received a Notice of Potential Liability and Request to Perform RI/FS dated June 30, 2000, from USEPA. The company has decided that it will participate in the performance of the RI/FS. However, based on the current information known regarding this site, the company is unable to predict what its liability, if any, will be for this site.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
