Stepan Reports Record Quarterly and First Half Earnings

Northfield, Illinois, July 25, 2018 -- Stepan Company (NYSE: SCL) today reported:

Second Quarter Highlights

- Reported net income was a record \$32.9 million, or \$1.41 per diluted share versus \$27.9 million, or \$1.19 per diluted share, in the prior year. Adjusted net income* was a record \$32.1 million, or \$1.38 per diluted share versus \$30.9 million, or \$1.32 per diluted share, in the prior year.
- Consolidated net sales were \$519.9 million, up 5% versus the prior year. This increase was primarily attributable to 5% global volume growth. The Company's first quarter acquisition of BASF's production facility in Mexico accounted for 2% and 3% of the quarterly increases in consolidated net sales and global volume growth, respectively.
- Surfactant operating income was \$34.2 million versus \$31.2 million in the prior year. The increase was primarily attributable to higher North American demand within the consumer and functional product end markets. Global Surfactant sales volume increased 7% versus the prior year.
- Polymer operating income was \$19.5 million versus \$21.3 million in the prior year. This decrease was
 mostly due to less favorable product mix and margin pressures. Global Polymer sales volume was up
 1% versus the prior year.
- Specialty Product operating income was down \$1.2 million versus the prior year. This decrease was primarily attributable to lower margins within the food and nutritional business and order timing differences within the flavor business.
- The Company's net-debt ratio declined slightly to 4%.

First Half Highlights

- Reported net income was a record \$63.6 million, or \$2.73 per diluted share, up 6% versus \$59.8 million, or \$2.56 per diluted share, in the prior year.
- Adjusted net income* was a record \$64.1 million, or \$2.75 per diluted share, a 2% increase versus \$62.6 million, or \$2.68 per diluted share, in the prior year. Total Company sales volume increased 3% compared to the first half of 2017.
- * Adjusted net income is a non-GAAP measure which excludes Deferred Compensation income/ expense as well as other significant and infrequent/non-recurring items. See Table II for reconciliations of non-GAAP adjusted net income and adjusted earnings per diluted share.

"The Company had a good first half, delivering record quarterly and year-to-date results. These results were driven by record first half Surfactant earnings and a lower 2018 effective tax rate," said F. Quinn Stepan, Jr., Chairman, President and Chief Executive Officer. "The Polymer business improved versus first quarter results despite margin and share challenges

in our North American polyol business. European polyol volumes rebounded to prior year levels while both global specialty polyols and China delivered earnings growth. Our Specialty Product business results were down, partially due to changing order patterns, but we still anticipate full year income improvement from this segment."

Summary of Second Quarter Adjusted Net Income Items

Adjusted net income excludes non-operational deferred compensation income/expense and other significant and infrequent or non-recurring items.

- **Deferred Compensation:** The current year second quarter reported net income includes \$1.0 million of after-tax income versus \$2.5 million of after-tax expense in the prior year.
- **Business Restructuring:** The current year second quarter reported net income includes \$0.2 million of after-tax decommissioning expense related to the Canadian plant closure versus \$0.5 million of after-tax expense in the prior year.

Percentage Change in Net Sales

The 5% increase in quarterly net sales was primarily attributable to sales volume growth. The positive impact of foreign currency translation offset slightly lower selling prices.

^{*} The 2017 operating income line items have been immaterially changed from the amounts originally reported as a result of the Company's first quarter 2018 adoption of ASU No. 2017-07 Compensation-Retirement Benefits (Topic 715).

Total segment operating income increased slightly in the quarter to \$57.9 million. Total segment operating income in the first half declined \$4.3 million, or 4%, versus the prior year.

- Surfactant net sales were \$356.9 million for the quarter, an 8% increase versus the prior year. Sales volume increased 7% in total and 3% excluding the first quarter acquisition in Mexico. The organic growth was mostly due to higher North American consumer product and oilfield volumes. Higher sales to the Company's distribution partners in North America also contributed to this increase. Selling prices increased 1% compared to the prior year quarter and the translation impact of foreign currencies had a nominal impact in the quarter. Surfactant operating income increased \$3.1 million versus the prior year, primarily due to higher volumes, a more favorable product mix and improved internal efficiencies.
- Polymer net sales were \$140.9 million for the quarter, essentially flat versus prior year. Total sales volume increased 1% despite a 1% decline in global polyol volumes. The Company believes that the market for insulation materials remains strong due to continued global energy conservation efforts. The translation impact of a weaker U.S. dollar favorably impacted net sales by 2% while selling prices declined by 3%. Polymer operating income decreased by \$1.8 million versus the prior year quarter due to a less favorable product mix and margin challenges.

• Specialty Product net sales were \$22.1 million, a 10% decrease versus the prior year. Operating income decreased \$1.2 million versus the prior year quarter primarily due to order timing differences in our flavor business and lower margins in our food and nutritional business.

^{*} See Table III for a discussion of deferred compensation plan accounting.

• Corporate expenses, excluding deferred compensation and business restructuring expenses, increased \$0.7 million, or 5%, for the quarter. Corporate expenses increased \$2.1 million, or 8%, for the first six months of 2018. Most of the quarterly and year-to-date increase is attributable to higher salaries and legal expense, partially offset by lower consulting fees.

Income Taxes

The effective tax rate was 20.6% for the first half of 2018 compared to 26.5% for the first half of 2017. This decrease was primarily attributable to a lower U.S. statutory tax rate of 21% in the first half of 2018 versus 35% in the first half of 2017. The Company expects its full year effective tax rate to be in the range of 20% to 23%.

Shareholder Return

The Company returned \$14.6 million to shareholders in the second quarter with \$5.1 million of dividends and \$9.5 million of share repurchases. In the first half of 2018 the Company has paid \$10.2 million of dividends and repurchased \$12.0 million of Company stock. The Company has 520,275 shares remaining under its Board authorized share repurchase plan. The Company has increased the dividend rate on the Company's common stock for 50 consecutive years.

Selected Balance Sheet Information

The Company's net debt level decreased \$16.1 million for the quarter while the net debt ratio dropped from 6% to 4%, mainly attributable to a \$12.1 million increase in cash.

Total	\$	299.4	\$ 310.6	\$ 261.2

Capital spending was \$16.3 million during the quarter and \$43.7 million during the first half of 2018. This compares to \$17.9 million and \$38.3 million, respectively, in the prior year. For the full year, capital expenditures are expected to be between \$90 million and \$100 million.

Outlook

"After achieving record first half net income, we remain optimistic about the balance of the year. We believe our Surfactant business will continue to build upon its strong start and further benefit from our diversification efforts into functional products, new technologies, improved internal efficiencies and expanded sales into our broad customer base globally," said F. Quinn Stepan, Jr., Chairman, President and Chief Executive Officer. "Although margins will continue to challenge us in our North America Polymer business we are optimistic about additional volume opportunities for the remainder of the year. We believe full year Specialty Product results should improve over 2017."

Deferred Compensation Plan

The full effect of the deferred compensation plan on quarterly pre-tax income was \$1.3 million of income versus \$4.1 million of expense in the prior year. There was de minimis year-to-date impact in 2018 versus \$2.8 million of expense in the prior year. The accounting for the deferred compensation plan results in operating income when the price of Company common stock or mutual funds held in the plan fall and expense when they rise. The Company also recognizes the change in value of mutual funds as investment income or loss. The quarter end market prices of Company common stock are as follows:

		<u>2018</u>	<u>2017</u>

Effects of Foreign Currency Translation

The Company's foreign subsidiaries transact business and report financial results in their respective local currencies. As a result, foreign subsidiary income statements are translated into U.S. dollars at average foreign exchange rates appropriate for the reporting period. Because foreign exchange rates fluctuate against the U.S. dollar over time, foreign currency translation affects period-to-period comparisons of financial statement items (i.e., because foreign exchange rates fluctuate, similar period-to-period local currency results for a foreign subsidiary may translate into different U.S. dollar results). Below is a table that presents the impact that foreign currency translation had on the changes in consolidated net sales and various income line items for the three and six month periods ending June 30, 2018 as compared to 2017:
